

1. Yellow shaded area is bathroom - aprox 3m x 2m - thinking of putting a mezzanine floor there.
2. Pink wall - structural internal wall - with two openings to divide garage from granny flat area.
3. - All doors and window openings are to be empty openings as we will provide our own windows and doors.
4. Would like window openings along the upright sections (left and right under the middle roof) of the middle bay section to allow light into living area, I do realise that this will result in the requirement of the middle bay roof height to be higher than normal.
5. Patio area under the same roof line (extend roof over patio)- with no side walls right and left.
